## WEIMA briquetting presses TH Standard series

TH 514 • TH 614 • TH 714 • TH 814

Briquette diameter (mm)

## Performance profile

The TH Standard series is designed for plants with required throughput rates of more than $175 \mathrm{lbs}(80 \mathrm{~kg})$ per hour or more than $440 \mathrm{lbs}(200 \mathrm{~kg})$ per day. The sturdy press housing enables the production of highly compact briquettes - from materials such as wood, polystyrene, foam, light alloy, paper or biomass.

All machines are available as a left or right-hand design.
The hopper is mounted on a sturdy base frame which allows for easy installation and mobile use.

## An overview of the TH Standard series

Right-hand design

Hydraulic dimensions apply to TH 614 and TH 714.
Dimensions hydr. 100 L (TH 514): $35.5^{\prime \prime} \times 19^{\prime \prime} \times 34^{\prime \prime}(900 \times 480 \times 870 \mathrm{~mm})(\mathrm{L} \times \mathrm{W} \times \mathrm{H})$
(Numbers in parentheses are in mm) Dimensions hydr. 250 L (TH 814): $42^{\prime \prime} \times 21^{\prime \prime} \times 50 "(1075 \times 530 \times 1280 \mathrm{~mm})(\mathrm{L} \times \mathrm{W} \times \mathrm{H})$
